Cybersecurity Analyst Intern

TATA (Virtual)

Front-End Software Engineering Job Simulation

SKYSCANNER(Virtual)

Data Science Job Simulation

BRITISH AIRWAYS(Virtual)

PROJECTS

Restaurant Menu Web App

Developed a full-stack web application using **Java and Spring Boot** for backend logic and **MySQL** for database management. Created a responsive frontend using HTML, CSS, and JavaScript.

Silver Management System

Built a cross-platform application using **Flutter and Android Studio** with a **PHP** backend and **MongoDB** for data storage.

Company Website (Marathi Localization)

Designed and deployed a professional corporate website using **Node.js** for the backend. Implemented a unique Marathi language toggle feature to cater to local users.

Bank Churn Prediction System

Created a data-driven application using **Python and Node.js**, featuring a frontend built with **React.js (TypeScript)** to visualize predictive analytics.

Crime Analysis System

Developed an analytical dashboard using the **Streamlit framework** and Python, integrating embedded HTML/CSS for a custom user interface.

Portfolio Website

Designed a personal professional site using **HTML5, CSS3, and JavaScript** to showcase projects and technical skills with a minimalist aesthetic.
