

SANIYA THAKUR

Junior AI/ML Engineer

Maharashtra, India | +91 7038022561 | thakursaniya102@gmail.com

LinkedIn: [linkedin.com](https://www.linkedin.com) | GitHub: github.com | Portfolio: saniya-thakur.com

PROFESSIONAL SUMMARY

Passionate MCA student with hands-on experience building full-stack and AI-powered applications using Python, React, and FastAPI. Skilled in developing scalable software solutions, REST APIs, and modern web applications, with familiarity in LLMs and machine learning concepts. Strong problem-solving ability with a keen interest in software engineering, full-stack development, and backend systems.

TECHNICAL EXPERTISE

AI & Machine Learning: Machine Learning, Deep Learning, Large Language Models (LLMs), Natural Language Processing (NLP), Prompt Engineering, RAG Pipelines, Hugging Face, OpenAI/ Gemini APIs.

Languages & Core Coding: Python, JavaScript, TypeScript, SQL, HTML, CSS.

Frameworks & Web UI: React.js, Flask, FastAPI, Django, Node.js.

Databases & DevOps: MySQL, GitHub, RESTful APIs, Vercel, Render, Docker, Kubernetes, CI/CD pipelines.

PROJECTS

Multi-Modal Medical AI Agent (Python, FastAPI, GenAI, PaddleOCR, OpenCV, JavaScript)

Developed a hybrid AI medical report analyzer combining Computer Vision (PaddleOCR) with Generative AI (OpenRouter LLM) for intelligent report interpretation. Integrated GenAI API to generate professional medical summaries from extracted data, with secure environment management (.env). Built responsive web interface with drag-and-drop functionality for real-time analysis and results visualization.

Bank Churn Prediction System (Python, Pandas, Scikit-learn, Flask, React)

Engineered a predictive machine learning pipeline using a Random Forest algorithm to analyse customer churn metrics in the banking sector. Conducted feature engineering and model evaluation; constructed a responsive user interface to stream live data analytics.

Hinglish Sentiment Analysis System (Python, Natural Language Processing, Scikit-learn)

Created an NLP-based text analysis pipeline to categorize sentiments within multilingual (Hindi + English) social media feedback datasets. Pre-processed unstructured text data and applied classification algorithms to optimize contextual understanding metrics. Hugging Face Spaces

INTERNSHIPS & VIRTUAL SIMULATIONS

- Web & Application Development Intern | Binary Solutions (4 Months) – Programmed mobile UI components using Android Studio and Flutter.
- Technology Job Simulations: Data Analytics (Deloitte) | Cybersecurity Analyst (Tata) | Front-End Engineering (Skyscanner).

EDUCATION & CREDENTIALS

- Master of Computer Applications (MCA) | Shivaji University, Kolhapur (Completed 2024 – 2026)
- Bachelor of Computer Applications (BCA) | Punyashlok Ahilyadevi Holkar University, Solapur (Completed 2021 – 2024)
